General Application Scoring Guide

Select the score that best reflects the applicant overall in each criteria. Assume that the applicant should get a 10 and then reduce the score as you see fit if the applicant does not meet all of the criteria. The applicant does not need to achieve every item in the category, score them where they predominantly fit. If the applicant does not achieve an acceptable level, you may score them less than six. Applicants with a total average score of less than six are not funded and may not apply for other funding in that fiscal year. Scores should be proportional (i.e., a one score in a category indicates the applicant achieved zero criteria. Do not compare applicants to each other, only against the criteria.
